

PROTECT AND RESTRAIN

Shown: AutoLock® Defender

ENGINEERED FOR OFFICER SAFETY

Utilizing a revolutionary cam and ball bearing action, AutoLock® is ready when you are.

- Once opened, it stays locked into place until you're ready to collapse it.
- Compact and comfortable to wear, AutoLock is designed to be carried with you at all times.
- Monadnock® offers a wide choice of sizes, grips, tips and holders for the AutoLock baton.
- The AutoLock can be used with virtually all standard baton techniques and tactics or training programs.
- It carries a lifetime repair or replacement guarantee.
- Made in the USA.

THE CHOICE IS YOURS

AUTOLOCK TRAINING

Monadnock is a well respected and internationally known name in law enforcement education through the Monadnock Police Training Council.

- The Council's certification standards and procedures are structured to meet contemporary legal challenges.
- The curricula are fully researched in terms of tactical, medical and legal consequences resulting from police intervention.
- A cadre of competent expert witnesses stand behind all Council Certification programs.

THE COUNCIL'S PHILOSOPHY

Because human rights are a critical concern at Monadnock, we have put our certification policy of "Protect & Restrain" to work in all of our curricula. Today more than 40,000 instructors, 3,000 instructor-trainers and 91 international instructors are teaching Monadnock's certification programs in their respective agencies (or assisting at other law enforcement departments). This is a source of great pride for us at Monadnock as well as evidence for you to evaluate both our success and longevity as an international educational resource.

To learn more, visit the Training Council at www.trainingcouncil.org.

PROTECT AND RESTRAIN

CHOOSE FROM TWO OPENING MOVES – HIGH OR LOW PROFILE – DEPENDING ON YOUR SITUATION.

High Profile Draw

- AutoLock opens and locks into place with the flick of your wrist.
- Distinct sound sends a signal to your opponent that you are armed and ready.
- Psychological advantage may be all that is needed to make a subject rethink resisting.

Low Profile Draw

- Retain the element of surprise by pulling the shaft out using the Safety Tip® or the Power Safety Tip® to lock the baton in place.
- This nearly silent draw method allows you to be ready for action without escalating the situation unnecessarily.
- This method is also recommended for crowded or confined areas.

BATON RETENTION IS CRITICAL: MAXIMIZE YOUR BATON RETENTION WITH THE HINDI BATON CAP™

This innovative device offers a number of benefits:

- Keeps your baton in your hand and out of the hands of violent subjects.
- Enhances the performance of your baton during striking and restraint techniques.

It also offers the following features:

- Firm grip for maximum performance and control during training or in field use.
- Locate you baton on your belt easily for quick drawing.
- Greatly reduces the chance of the baton collapsing upon striking a hard surface.
- Won't roll far if dropped, making it easy to pick up.

PERFORMANCE PLUS PROTECTION

The Power Safety Tip® and the Safety Tip® are made of urethane, virtually eliminating sharp edges.

- Decreases the possibility of a subject injury since the tip is rubber and not steel.
- Engineered to turn a subject's pockets inside out, reducing the risk of getting stuck with needles, knives or other sharp objects.
- The weighted tip gives you more effective strikes.

3xT POWER SAFETY TIP

3xT POWER SAFETY TIP

The 3xT lime green Tactical Targeting Power Safety Tip helps criminal justice professionals improve their striking skill because they can clearly see the track of the baton's tip during demonstrations, practice and/or on the job. The 3xT can be retrofitted on any AutoLock baton with a Power Safety Tip.

STRENGTH YOU CAN COUNT ON

The three stage AutoLock baton can effectively block an attack and restrain a large opponent.

- Made from cold drawn 4130 aircraft seamless alloy steel tubing.
- Engineered using Computer Aided Design (CAD) & state-of-the-art machinery.
- Machined shafts for added strength.
- Designed with high-tech and patented cam ball bearings and locking mechanism to ensure the baton stays locked open while performing striking and jabbing techniques.

HOLD YOUR OWN AGAINST AN OPPONENT

- The SuperGrip® has a fluted surface texture that enhances control and retention.
- The rotating shafts and ball bearing action also help you retain your baton should a suspect grab the shaft and try to twist it away.

CLOSES WITH THE PUSH OF A BUTTON

- Push the button in the end cap with your index finger and the shafts of the AutoLock conveniently slide back into the handle.
- No need to bend over and strike the baton on the ground or a hard surface.
- When used with the appropriate Front Draw® holder, the AutoLock is positioned out of the way but is readily accessible and can be quickly drawn when needed.

FRONT DRAW HOLDER WITH CLIP-ON BACK FOR THE AUTOLOCK BATON

- 360° swivel capability with 8 locking positions
- 45° swivel capability also available
- Made from durable polycarbonate
- Secures the baton with interior spring pressure in open and closed positions
- Available in plain and basketweave finishes

TEST AND EVALUATION PROGRAM

Monadnock is pleased to offer a risk-free program designed to give agencies the opportunity to test our products first-hand, before purchasing. That way, our customers are 100% certain which batons best meet their needs. Participants in this program are under no obligation to make a purchase.

To take part in Monadnock's Test & Evaluation Program, simply call us at (800) 258-5492 or (603) 585-6810 and we'll be happy to give you the details.
