

ENGINEERED FOR OFFICER SAFETY

You can feel the kinetic power surge as the Classic Friction Lock baton from Monadnock® snaps to attention!

- This durable 3-stage telescopic collapsible baton has exclusive built-in safety features that make it easy to access, open, control and hold on to.
- Once opened, it stays locked in place until you're ready to collapse it.
- There are a wide variety of sizes, tips, grips and holders available.
- It can be used with virtually all standard baton techniques and tactics or training programs.
- It carries a lifetime repair or replacement guarantee.
- Made in the USA

PROTECT AND RESTRAIN.

CLASSIC TRAINING

Monadnock is a well respected and internationally known name in law enforcement education through the Monadnock Police Training Council.

- The Council's certification standards and procedures are structured to meet contemporary legal challenges
- The curricula are fully researched in terms of tactical, medical and legal consequences resulting from police intervention
- A cadre of competent expert witnesses stand behind all Council Certification programs

THE COUNCIL'S PHILOSOPHY

Because human rights are a critical concern at Monadnock, we have put our certification policy of "Protect & Restrain" to work in all of our curricula. Today more than 40,000 instructors, 3,000 instructor-trainers and 91 international instructors are teaching Monadnock's certification programs in their respective agencies (or assisting at other law enforcement departments). This is a source of great pride for us at Monadnock as well as evidence for you to evaluate both our success and longevity as an international educational resource.

To learn more, visit the Training Council at www.trainingcouncil.org.

Classic Friction

LOCK BATONS

PROTECT AND RESTRAIN

CHOOSE FROM TWO OPENING MOVES – HIGH OR LOW PROFILE – DEPENDING ON YOUR SITUATION

High Profile Draw

- Classic Friction Lock batons open and lock into place with the flick of your wrist.
- Distinct sound sends a signal to your opponent that you are armed and ready.
- Psychological advantage may be all that is needed to make a subject rethink resisting.

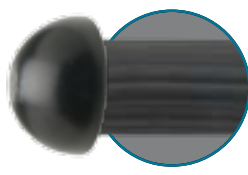

Low Profile Draw

- Retain the element of surprise by pulling the shaft out using the Power Safety Tip® to lock the baton in place.
- This nearly silent draw method allows you to be ready for action without escalating the situation unnecessarily.
- This method is also recommended for crowded or confined areas.

BATON RETENTION IS CRITICAL: MAXIMIZE YOUR BATON RETENTION WITH THE HINDI BATON CAP™

This innovative device offers a number of benefits:

- Keeps your baton in your hand and out of the hands of violent subjects.
- Enhances the performance of your baton during striking and restraint techniques.

HINDI CAP™
Model 6210

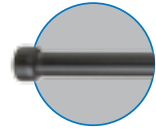

It also offers the following features:

- Firm grip for maximum performance and control during training or in field use.
- Locate your baton on your belt easily for quick drawing.
- Close your baton quickly and easily because your palm centers over the tip.
- Won't roll far if dropped, making it easy to pick up.

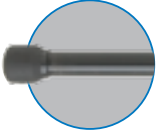

SAFETY TIP® AND POWER SAFETY TIP® – PERFORMANCE PLUS PROTECTION

The Power Safety Tip and the Safety Tip are made of urethane, virtually eliminating tip degradation.

- Tips are engineered to help turn a subject's pockets inside out, reducing risk of getting stuck with sharp objects.
- Larger, weighted Power Safety Tip allows more effective strikes.

STANDARD STEEL TIP

SAFETY TIP®

POWER SAFETY TIP®

GET TOUGH ON CRIME

- Made from cold drawn 4130 aircraft seamless alloy steel tubing.
- Engineered using Computer Aided Design (CAD) and state-of-the-art machinery.
- Thanks to precision Morse tapers, the tight locking joints make the baton feel solid in your hand.
- The larger weighted tips help you perform more effective strikes.

HOLD YOUR OWN AGAINST AN OPPONENT

- The Super Grip® has a fluted surface texture that enhances control and retention especially in inclement weather
- The foam grip has high tear strength and a machined knurling underneath to better hold it in place

FRONT DRAW® HOLDER WITH CLIP-ON BACK

- 360° swivel capability with 8 locking positions
- 45° swivel capability also available
- Made from durable polycarbonate
- Secures the baton with interior spring pressure in open and closed positions
- Available in plain and basketweave finishes

TEST AND EVALUATION PROGRAM

Monadnock® is pleased to offer a risk-free program designed to give agencies the opportunity to test our products first-hand, before purchasing. That way, our customers are 100% certain which batons best meet their needs. Participants in this program are under no obligation to make a purchase.

To take part in Monadnock's Test & Evaluation Program, simply call us at (800) 258-5492 or (603) 585-6810 and we'll be happy to give you the details.
